Vestax

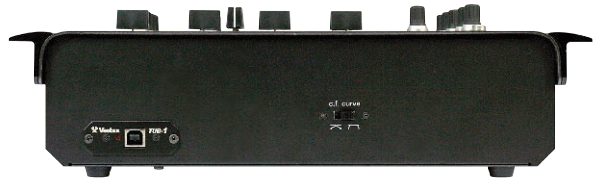
THE NEXT STYLE OF DJING!

VESTAX PRODUCT INFORMATION

SEP.2007

VMC black series

Standard Mixer



INTRODUCTION

In 2006 Vestax released the VMC white color series to breakthrough the stagnation of the DJ market, which was covered with similar DJ products, with its pop and fresh appearance. Vestax sold a total of 15,000 units of the VMC white color series world wide and won new users.

While other companies copy products fade away, the VMC series has become a world standard. Now with a new metallic black color, it offers a cool and solid appearance which perfectly matches its high reliability and the quality of its basic performance. An expansion slot has been added as an option for USB connection, living up to the needs of PC DJ's.
