

VCI-300

DJ Controller

WANT TO BE A DJ = VCI-300, Computer and Headphones!

INTRODUCTION

TVestax and Serato have joined forces.

Sharing their technology and compiled feedback from Pro DJ's and users from around the world, they have created a dedicated DJ USB MIDI / Audio system and software offering absolute control.

The VCI-300 is a dedicated USB MIDI controller for the included Serato DJ software. It also comes with a built in audio interface with standard 4in/4out and headphone connection, which means all you need for DJing is the VCI-300, a laptop and a set of headphones.

New features such as the [Emergency Thru Switch], which avoids the sound from stopping when the computer freezes, is an added feature from study of user feedback. Another is the new weight reduced JOG wheel and the adjustable JOG wheel torque mechanism to avoid vibration from low frequency feedback. .

FEATURES

> HIGH RESOLUTION CONTROL

The VCI-300 can control more than 90 parameters and functions of the included Serato software with high resolution MIDI signals sent via USB. The pulse resolution of the JOG wheel and pitch control fader is 4 times higher than the VCI-100 and provides precise control of each function. The pitch control fader also shares the same high quality fader parts of the input fader for advanced operability.

> SUPERB AUDIO CHARACTERISTIC

The built-in audio interface carries a Audio Codec IC with superb audio characteristic, generated by a delta-sigma modulation 24 bit stereo D/A&A/D converter. Audio connection includes 1 stereo input, 1 MIC input and 2 stereo output (Master L/R, Monitor L/R).

> LEVEL INDICATION

A 12 level LED L/R indicator is set in the center of the top panel to monitor sound levels.

> FILE CONTROL

Audio files in the software library can be easily selected and controlled with the CRATES / FILES / BROWSE key and the cursor switch inherited from the VCM-100.

> EMERGENCY THRU SWITCH

The Emergency Thru Switch located on the rear panel is a countermeasure feature to avoid sound from stopping when the computer freezes. It instantly switches the output source from the computer to other audio players connected to the VCI-300.

> ADJUSTABLE JOG WHEEL TORQUE

The torque of each JOG wheel can be adjusted to prevent them from moving from low frequency feedback and altering the pitch when using the VCI-300 in such places like clubs.

> FADER CURVE CONTROL

The fader curve of each fader can be adjusted to the preferred characteristics for long mixes, scratching and any other style.
